Galls Qualifications Statement

City of Rockford
Bid Number 514-P-056:

III. Specific Requirements

B. Method of Ordering

Included in our bid submission is a section detailing an on-line ordering system that will be customized specifically for the City of Rockford Police Department if Galls were awarded bid 514-P-056.

E. Fittings and Alterations

If awarded the bid Galls will contract with a local tailor who will alter garments on an as needed basis for the officers.

Galls will have a Sales Representative on site at RPD twice per year for sizing of officers as well as recruit classes. Additional visits can be scheduled based on need and availability if agreed upon by Galls and RPD.

G. Transition

Galls will not store stock currently held by Rockford Police Department.

System Capabilities

- *Secure Online Ordering System*
  - Site is only accessible by users defined and approved by customer through unique user names and password assignment
- *Configurable based on Customer Uniform Program Requirements*
  - Designed to support a broad range of customer uniform program requirements
  - A uniform program profile is established with each customer to be serviced through the GQ B2B system. This profile defines the operating parameters in which the system will govern the program, to include: employee management, allotment management, product offering, delivery requirements, and invoicing.
- *Employee Management*
  - GQ B2B provides an employee based management and tracking segment.
  - Employee information, required to properly process order and provide management reports, is warehoused in our systems data storage. This information includes: employee code, name, address (if appropriate to the program requirement), anniversary date, department, rank, assigned location, designation, and employee group.
  - Historical & distribution data is also maintained for each employee. This data is the basis for management reports, and is collected as orders are placed and distributed. Historical data includes items distributed (to the size level), along with quantities and order/shipment dates.
- *Product Offering Management*
  - Product offerings for the uniform program are defined, and are assigned to the respective employee groups when a uniform program is established on the system.
  - Employee Groups, or shop-by locations, typically represents a job function or physical location. Such as if a uniform program was for a police department, there may be Shop-By Location for "Patrol", "Swat", "K-9", etc. with each group having a specific uniform products assigned to them. During order placement, only products associated with the Shop-By Location the employee is assigned to are available for order. This ensures that the employee can only order those products required for his/her job function.
  - GQ B2B supports alterations, such as trouser hemming, application of badges, etc. These elements are defined based on the requirements of the uniform program, and may be limited to specific styles and employee groups.
- *Optional "Shop Full Catalog" Feature*
  - Feature allows the customer to add the entire Galls.com product offering to their website at a negotiated percent discount off retail.
  - Reduces the need to call for quotes on items that are needed right away

- Keep in mind that customized VAS options are not available on these items

- *Optional "Package Ordering" Feature*
  - Feature allows the user to create "Packages" of items that are frequently ordered at the same time (ex. "New Hire Package," "New Vehicle Package")
  - "Package" orders are bundled and shipped together by user
  - This feature reduces the number of clicks per order and reduces errors during order entry by ensuring that all needed items are ordered before processing
- *Optional Allotment Management*
  - The system provides employee allotment management based on dollars OR units.
  - If permitted by the uniform program profile, employees may purchase uniforms in excess of their allotment amount via credit card.
  - Allotments may be renewed on the employee's anniversary date, the calendar year (each January 1), or a specific date.
  - Unused allotments may be rolled over to the new allotment year in its entirety, or a portion of the unused allotment may be rolled over, or no rollover based on the Uniform Program Profile.
  - If Allotment Management is required for the uniform program, the employee's available allotment is verified during the checkout process.
    - If the amount ordered exceeds the employee's available allotment and the program allows employee payments for amounts over the allotment via credit card, the checkout process remains active, and the employee will be prompted for credit card information during the checkout process.
    - If there is not sufficient allotment to cover the order amount and the program does not permit payment of the overage by the employee (via credit card), the checkout process will be disallowed until the order is altered to be within the employee's available allotment amount.
- *Optional Payroll Deduction Management*
  - Much like allotment management, the system can deposit, track, and renew payroll deduction funds to users
  - Renewal periods are identical to allotment renewals (anniversary date or calendar date)
  - Detailed month-end reporting available as well as on-demand reporting to track balances
  - Payroll deduction funds may be used in conjunction with other pay methods if allotment is exceeded or the employee does not have available funds on his/her credit card but need to make a purchase
- *Controlled Uniform Order Placement*
  - The system controls uniform order placement by tying together the Employee, Product Offering, Shop-By Location and Allotment Management segments of the system, as governed by the uniform program profile.
  - The system provides a web-based method for customer uniform administrators or employees to place uniform orders. The product offering and associated optional

alteration options are displayed are based on the ordering employee's employee group assignment. Any mandatory alterations, such as standard department patch are garment, are hard code in the back system to ensure no mandatory alteration is missed during order placement on the website.

- System allows for orders to placed using a "shop-by individual" feature which provides an administrator the ability to place a large bulk uniform order and segment the order down to the individual employee level, eliminating the necessity to place a separate order for each employee.

- *Optional On-Line Order approval*
  - A customer may require all order or certain orders be approved by an Administrator prior to being processed. GQ B2B allows for approval gates to be established from shipping to order dollar amount which are defined in the Uniform Program Profile. These orders remain in a "Hold for Approval" status until released by an Administrator. GQ provides information on these orders to the Administrators through system generated approval emails sent to the Administrator which allows the order to be approved through the links provided in the email, or on the Administrator's user dashboard on the website.
  - Upon order approval, the order is released to the back-office system for fulfillment. Denied orders assume a "denied" status, and are not released to the back-office system.
- *Integrated with Galls ERP system*
  - The system is integrated with Gall's order fulfillment system, to include functionality in the areas of distribution, inventory control, production planning and stock replenishment, as well as accounting support.
  - When an order is placed in the system, it is passed directly to the distribution system for fulfillment of the order. As the order makes its way through the fulfillment process, the system is updated: 1) to confirm that the order was successfully received into the distribution system, 2) when the order is in process, and 3) when shipment is made. Shipment quantities and shipment dates are included in the data passed to the system from the distribution system.
  - As a result of the system order being passed to our back-office systems, our perpetual inventory is allocated/depleted. Our production-planning module recognizes the inventory depletion, and if warranted, triggers the stock replenishment process.
- *Flexible, On-Demand Management Reporting*
  - GQ B2B provides flexible, on-demand reporting with output into Excel .xls or Excel .xlsx, which allows for easy review and manipulation of the data output by the Administrators. The reporting can be sent directly to the requestors email or reviewed from the reports dashboard.
  - Available reports include:
    - Allotment Report
    - Order History Sales report
    - Itemized Sales report

        - Allotment Activity Report
        - Unit Allotment Activity Report
        - Backorder Report
        - Dropship Report
    - Within the various report offerings, the user may specify parameters such as date ranges, open or closed orders, or limit report data to a specific location or department, as applicable to the report.
- *Customer management of employees*
    - GQ B2B system, allows for department Administrators to have the ability to assign new users to the website, update user profiles, Shop-By Location, etc. should the customer chose the manager their own employee access to the website.

System Availability, Security and Technical Information

- System is available 24x7
- Minimal service outages for maintenance/upgrades – scheduled to 4x per year, with emergency outages being communicated as soon as possible.
- All secure web traffic is done using Verisign(Symantec) 2048 bit public key and SSL certificate 256 bit.
- System is based on IBM iSeries POWER 7 Technology
    - http://www-03.ibm.com/systems/i/index.html
- System utilized IBM DB2 for i data base
    - http://www-03.ibm.com/systems/i/software/db2/index.html
- The system is designed to allow for a minimum doubling in size/volume of the business without requiring any upgrades
