

Amendments to the:

**2009 International**

**Fire Code**

This code establishes the minimum requirements consistent with nationally recognized good practice for providing a reasonable level of life safety and property protection from hazards of fire, explosion or dangerous conditions in new and existing buildings, structures and premises and to provide safety to fire fighters and emergency responders during emergency operations

STATE OF ILLINOIS            )  
                                          ) SS  
COUNTY OF WINNEBAGO )

**CERTIFICATE OF PUBLICATION IN PAMPHLET FORM**

I, the undersigned, do hereby certify that I am the duly qualified and acting Legal Director and ex officio Keeper of the Records and Seal of the City of Rockford, Winnebago County, Illinois (the "City"), and as such official I am the keeper of the official journal of proceedings, books, records, minutes and files of the City and of the City Council (the "City Council") thereof.

I do further certify that on the 25th day of October, 2010, there was published in pamphlet form, by authority of the City Council, a true, correct and complete copy of Ordinance No. **2010-123-O** and said ordinance as so published was on said date readily available for public inspection and distribution, in sufficient number, at my office as Legal Director and ex officio Keeper of the Records and Seal located in the City.

IN WITNESS WHEREOF I have affixed hereto my official signature and the seal of the City, this 25th day of October, 2010.

[SEAL]

  
\_\_\_\_\_  
LEGAL DIRECTOR AND EX OFFICIO  
KEEPER OF THE RECORDS AND SEAL

ORDINANCE NO. 2010-123-0

BE IT ORDAINED BY THE CITY COUNCIL OF THE CITY OF ROCKFORD, ILLINOIS, THAT:

Chapter 9, of the Code of Ordinances of the City of Rockford, Illinois, passed April 7, 2008, approved April 14, 2008, and published April 14, 2008 as amended, be and the same is hereby amended by the following, to wit:

**Section 9-111 is amended as follows:**

**Section 9-111 Fire Code Adopted by reference.**

The ICC International Fire Code/2009, as recommended and maintained by the International Code Council, Inc. including Appendix B, C, D, E, F, G, H, I and J is hereby referred to, adopted, and made a part hereof, as if fully set out in this article, with the additions, insertions, deletions and amendments contained in Section 9-112 and Section 9-113.

**Section 9-112 is amended as follows:**

Whenever the term "fire code official" is used it shall mean the Chief of the Fire Department, or his designee, of the City of Rockford, Illinois.

**Section 9-113 is amended as follows:**

**Section 9-113 Amendments, additions and deletions to the International Fire Code.**

The ICC International Fire Code/2009 is amended as follows:

1. One day use in conjunction with residential uses unless the tent, canopy requires electrical permit and inspections due to use of electric equipment.
2. Tents used exclusively for private recreational purposes.
3. Tents or canopies used in conjunction with funeral services.
4. Tents open on all sides which comply with all of the following:
  - a. Individual tents shall have a maximum size of 400 square feet (65 m<sup>2</sup>).
  - b. The aggregate area of multiple tents placed side by side without a fire break clearance of not less than 12 feet (3658 mm) shall not exceed 700 square feet (65 m<sup>2</sup>) total.
  - c. Tents, canopies or membrane structures shall not be located within 20 feet (6096mm) of lot lines, buildings or other tents or membrane structures, parked vehicles or combustion engines unless approved by the fire code official.

(8) Section 105.8 is added as follows:

**105.8 Licenses.**

- (a) A license shall be the authority issued by the comptroller in connection with the recommendation of the fire department, for the conducting of a business, trade, occupation or calling.
- (b) License requirements are as set out specifically in the ICC International Fire Code and the amendments adopted thereto, and Rockford Code of Ordinances, Chapter 7, Business, Trades and Occupations.

(9) Section 108.1 is deleted in its entirety and replaced as follows:

**108.1 Board of appeals established.** The board of appeals shall be the same board of appeals as set forth in Section 113 and appendix B of the ICC International Building Code.

(10) Section 109.2.1 is deleted and replaced as follows:

**109.2.1 Service.** Such notice shall be deemed to be properly served if a copy thereof is:

1. Delivered to the owner personally; or
2. Sent by first class mail, postage prepaid, to the owner at the last known address; or
3. Sent by certified mail, postage prepaid, addressed to the owner at the last known address with return receipt requested, if required by law.

(11) Section 109.3 is amended as follows:

**109.3 Violation penalties.** *Persons* who shall violate a provision of this code or shall fail to comply with any of the requirements thereof or who shall erect, install, alter, repair or do work in violation of the *approved construction documents* or directive of the *fire code official*, or of a permit or certificate used under provisions of this code, shall be subject to penalties within the limits provided in state and local laws and guilty of a [SPECIFY OFFENSE] punishable by a fine of not less than 50 and not more than [750] dollars ~~or by imprisonment not exceeding [NUMBER OF DAYS], or both such fine and imprisonment.~~ Each day that a violation continues after due notice has been served shall be deemed a separate offense.

(12) Section 110.5 is added as follows:

**110.5 Debris as nuisance.** Debris remaining at the scene of a fire after the site has been released by the fire department shall constitute a nuisance. Property owner shall be notified of said nuisance and, if not rectified to standards established by fire inspectors, said debris shall be removed by the city or its duly authorized agent. Costs for removal shall become a lien against the property or other actions permitted by law.

(13) Section 202 is amended as follows:

The definition of “canopy” is deleted and replaced with the following:

**CANOPY.** A nonpermanent structure, enclosure or shelter constructed of fabric or pliable materials supported by any manner, except by air or the contents it protects, and is open without sidewalls or drops on 75 percent or more of the perimeter.

(14) Section 202 Definitions:

**SECTION 202 GENERAL DEFINITIONS  
OCCUPANCY CLASSIFICATION**

**R-1** Delete the term “transient” as it refers to Hotels and Motels.

**R-1** Delete *Boarding House* from occupancy R-1.

**R-2** Delete Hotels (nontransient) and Motels (nontransient) from the list of residential occupancies.

**R-2** Delete the term nontransient from Boarding House.

(15) Section 202 is amended as follows by adding the following definitions:

**OCCUPANCY CLASSIFICATION.** To help clarify how to distinguish occupancies listed in this Section and to summarize requirements of Sections 903 and 907 the following table is hereby established:

Occupancy→	E Educational		I1 Institutional	I2 Institutional	I4 Institutional		R4 Residential	R3 Residential	
Requirements ↓	Day Care  * if all child care rooms located at level of exit discharge and each has an exit door directly to exterior. If not, classified as Group I-4		Board care, assisted living, convalescent facilities, half-way home, group home, congregate care, social rehabilitation, alcohol & drug centers, etc.	Child Care Facility	Adult or Child Day Care that is <u>not</u> an accessory to a place of worship - A3- used only during religious functions  ** More than 5 adults capable of self preservation are classified Group A3.		Residential Care/ Assisted Living	Residential Care/ Assisted Living	
Hours of care per day	< 24		24	24	< 24		any amount	24	
Number of care recipients	6 to 100*	<= 5	>= 17	>= 6	>= 6**		6 to 16	<= 5	
Age of care recipients in years	2 ½ or less*	> 2 ½	NA	2 ½ or less	> 2 ½	2 ½ or less	NA	NA	
Care recipients capable of responding in an emergency	No*	Yes	Yes	No	Yes**	No	Yes	Yes	
Sprinklers required	> 20,000 sf FA except when all classrooms w/ door to grade		Always	Always	> 16 care recipients		No	No	Per International Residential Code
Manual Fire Alarm required	> 50 occupants		Always	Always	> 16 care recipients		No	No	
Automatic Fire Detection required	No, unless per IBC 907.2.3		Always	Always	> 16 care recipients		No	No	
Single-Multiple Station Smoke Alarms required	No, unless per IBC 907.2.3		Not required where automatic fire detection provided	No, unless per IBC 907.2.6.1	Always and interconnected		Always and interconnected	Always and interconnected	

(16) Section 302.1 is amended as follows:

**302.1 Definitions.** Amend definitions as follows:

**BONFIRE.** An outdoor fire utilized for ceremonial purposes. A bonfire shall not be more than 5 feet (1524 mm) by 5 feet (1524 mm) by 5 feet (1524 mm) in dimension and shall not burn longer than 3 hours.

**RECREATIONAL FIRE.** An outdoor fire burning materials other than rubbish ~~where the fuel being burned is not contained in an incinerator, outdoor fireplace, portable outdoor fireplace, barbecue grill or barbecue pit and has with~~ a total fuel area of 3 feet(914 mm) or less in diameter and 2 feet (610 mm) or less in height for ~~pleasure, religious, ceremonial, cooking, warmth or similar purposes~~ food for human consumption.

(17) Section 307.4 is amended to delete exceptions 1 and 2.

(18) Section 307.4.1 is amended as follows:

**307.4.1 Bonfires.** A bonfire shall not be conducted within 50 feet (15 240 mm) of a structure of combustible material ~~unless bonfire is contained in a barbecue pit.~~ Conditions which would cause a fire to spread within 50 feet (15 240 mm) of a structure shall be eliminated prior to ignition.

(19) Section 307.4.1.1 through 307.4.1.2 are added as follows:

**307.4.1.1 Material.** Fuel for a bonfire shall consist only of seasoned dry firewood and other material approved by the code official. The bonfire shall be ignited with a small quantity of paper. The fire shall not be utilized for waste disposal purposes, and the fuel shall be chosen to minimize the generation of air contaminants.

**307.4.1.2 Permit.** All permits, required by section 105.6.31, shall be requested by and issued to the owner of the land upon which the bonfire is to be kindled.

(20) Section 307.4.3 is amended as follows:

**307.4.3 Portable outdoor fireplaces.** Portable outdoor fireplaces shall be used in accordance

~~with the manufacturer's instructions, and shall not be operated within 15 feet (3048 mm) of a structure or combustible material.~~

~~**Exception:** Portable outdoor fireplaces used at one and two family dwellings.~~

(21) Section 310.9 is added as follows:

**310.9 Careless smoking.** Any person, who by smoking or attempting to light such devices, in any manner in which any source of ignition is employed, who shall in any careless, reckless, or negligent manner whatsoever, whether willfully or wantonly or not, set fire to any bedding, furniture, curtains, any household fittings or any part of any building whatsoever so as to endanger life or property in any way or to any extent, shall be guilty of a misdemeanor.

(22) Section 505.1 is amended as follows:

**505.1 Address identification.** New and existing buildings shall have ~~approved~~ City of Rockford assigned address numbers, building numbers, or approved building identification placed in a position that is plainly legible and visible from the street or road ~~fronting the property to which the building is addressed.~~ These numbers shall contrast with their background. Address numbers shall be Arabic numerals or English alphabet letters. Numbers shall be a minimum of 4 3-inches (102 77 mm) high with a minimum stroke width of 0.5 inch (12.7 mm) ~~Where access is by means of a private road and the building cannot be viewed from the public way, a monument, pole or other sign or means shall be used to identify the structure when less than 100 feet from the street. When over 100 feet and less than 200 feet from the street, the numbers shall be 5 inches (128 mm) high. When over 200 feet from the street, the numbers shall be 7 inches (179 mm) high. Wherever the primary entry doors are visible from the address street, the numbers shall be displayed above, on or adjacent to the primary entry doors. Numbers shall be displayed where they remain visible at all times. Where a building is more than 500 feet from the street, displaying numbers on a building identification sign or other approved location near and viewable from the street are encouraged.~~

(23) Sections 506.3 and 506.4 are added as follows:

**506.3 Key Box Installation.** Any new or existing building with a supervised fire suppression or fire alarm system or as otherwise required by the fire

code official shall have an exterior key box to be provided and installed at the owners expense. The key box will be installed near the main Fire Department entrance as approved by the fire code official. Keys placed in the box shall be tagged for property, door and entry identification.

**Exception:** One and two family dwelling units.

**506.4 Key Box Specification.** Any reference to a key box within this code refers to specific key boxes as manufactured by Knox Box®.

(24) Section 507.2.3 is added as follows:

**507.2.3 Size of mains.** Water mains serving fire hydrant systems, on public or private property, shall not be installed on any new water main less than 8 inches (203 mm) in diameter.

(25) Section 901.4.2.1 is added as follows:

**901.4.2.1 Nonrequired fire protection systems – discontinuance:** All nonrequired fire protection systems shall be approved for discontinuance by the Fire Official. All discontinued equipment and devices, such as pull stations, nozzles, detectors, sprinklers, sensors, panels and hose connections shall be removed so as not to give a false indication that the structure, area or space is protected.

(26) Section 901.6.2 is amended as follows:

**901.6.2 Records.** Records of all system inspections, tests and maintenance required by the referenced standards shall be maintained on the premises for a minimum of ~~1~~ 3 ~~2~~ years ~~and made available to the code official upon request with copies sent by the vendors to the Division of Fire Prevention.~~

(27) Section 903.2.2 is deleted and replaced with the following:

**903.2.2 Group B.** An automatic sprinkler system shall be provided throughout buildings and portions thereof used as Group B as established by 903.2.2.1 through 903.2.2.2.

(28) Section 903.2.2.1 and 903.2.2.2 are added as follows:

**903.2.2.1 Group B ambulatory health care facilities.** An automatic sprinkler system shall be installed throughout all fire areas containing a Group B ambulatory health care facility occupancy when either of the following conditions exists at any time:

1. Four or more care recipients are incapable of self preservation.
2. One or more care recipients who are incapable of self preservation are located at other than the level of exit discharge serving such an occupancy.

**903.2.2.2 Group B.** An automatic sprinkler system shall be provided throughout all buildings containing a Group B occupancy where one of the following conditions exists:

1. A Group B fire area exceeds 12,000 square feet (1115 m<sup>2</sup>).
2. A Group B fire area is located more than two stories above grade plane.
3. The combined area of all Group B fire areas on all floors, including any mezzanines, exceeds 24,000 square feet (2230 m<sup>2</sup>).

(29) Section 903.2.4 is amended as follows:

**903.2.4 Group F-1, F-2.** An automatic sprinkler system shall be provided throughout all buildings containing a Group F- I occupancy where one of the following conditions exists:

1. A Group F- I and F-2 fire area exceeds 12,000 square feet (1115 m<sup>2</sup>).
2. A Group F-I and F-2 fire area is located more than ~~three~~ two stories above grade plane.
3. The combined area of all Group F-1 and F-2 fire areas on all floors, including any mezzanines, exceeds 24,000 square feet (2230 m<sup>2</sup>).

(30) Section 903.2.7 is amended as follows:

**903.2.7 Group M.** An automatic sprinkler system shall be provided throughout buildings containing a Group M occupancy where one of the following conditions exists:

1. A Group M fire area exceeds 12,000 square feet (1115 m<sup>2</sup>).

2. A Group *M* fire area is located more than ~~three~~ two stories above *grade plane*.
3. The combined area of all Group *M* fire areas on all floors, including any mezzanines, exceeds 24,000 square feet (2230 m<sup>2</sup>).
4. A Group *M* occupancy is used for the display and sale of upholstered furniture.

(31) Section 903.2.9 is amended as follows:

**903.2.9 Group S-1, S-2.** An automatic sprinkler system shall be provided throughout all buildings containing a Group S-I and S-2 occupancy where one of the following conditions exists:

1. A Group S- 1 and S-2 fire area exceeds 12,000 square feet (1115 m<sup>2</sup>).
2. A Group S-1 and S-2 fire area is located more than three stories above *grade plane*.
3. The combined area of all Group S-1 and S-2 fire areas on all floors, including any mezzanines, exceeds 24,000 square feet (2230 m<sup>2</sup>).
4. A Group S-1 and S-2 fire area used for tile storage of commercial trucks or buses where the fire area exceeds 5,000 square feet (464 m<sup>2</sup>).

**Exception:** One story Group S-2 occupancy buildings of type II or type IV construction with fire separation distances not less than 30 feet and which are occupied exclusively for storage of noncombustible materials that are not packed or crated in combustible materials. Under this exception, the permit and Certificate of Occupancy shall include specific reference to this exception and specific limitations of this exception. Also, the owner shall prepare a notice to all subsequent parties of interest for the property, to be recorded with the Winnebago County Recorder. This notice shall be provided to the code official and shall state the specific limitation of the exception being used, and that any other occupancy or use of the building will require the installation of an automatic sprinkler system. This notice shall be submitted, with required recording fee, to the city with permit application. The City shall record the notice.

(32) Section 903.2.11.1 item #3 is added as follows:

**903.2.11.1 Stories without openings.**

3. An interior stairway that conforms to requirements of Section 1005.0 with a fire

separation assembly enclosure of not less than 1 hour, which has a door directly to the exterior and the stair does not connect more than 2 stories. The basement or windowless story floor level shall be 15 feet (4572 mm) or less vertically from the exterior door threshold level and the door threshold shall be within 10 feet (3048 mm) of grade. Interior stair doors or openings shall be provided in each 50 linear feet (15240 mm) or fraction thereof on at least one side of the basement or windowless story.

(32) Section 903.2.12 is deleted:

(33) Section 903.3.1.1.1 is amended as follows:

**903.3.1.1.1 Exempt locations.** Automatic sprinklers shall not be required in the following rooms or areas where such rooms or areas are protected with an *approved* automatic fire detection system in accordance with Section 907.2 that will respond to visible or invisible particles of combustion or where an alternative automatic extinguishing system is installed in accordance with Section 904 as approved by the code official. Sprinklers shall not be omitted from any room merely because it is damp, of fire-resistance rated construction or contains electrical equipment.

1. Any room where the application of water, or flame and water, constitutes a serious life or fire hazard.
2. Any room or space where sprinklers are considered undesirable because of the nature of the contents, when *approved* by the *fire code official*.
3. Generator and transformer rooms separated from the remainder of the building by walls and floor/ceiling or roof/ceiling assemblies having a *fire-resistance rating* of not less than 2 hours.
4. ~~Rooms or areas that are of noncombustible construction with wholly noncombustible contents.~~
5. Fire service access elevator machine rooms and machinery spaces.

(34) Section 903.3.1.2.1 is deleted.

(35) Section 903.3.5 is amended as follows:

**903.3.5 Water supplies.** Water supplies for *automatic sprinkler systems* shall comply with this section and the standards reference in Section

903.3.1. The potable water supply shall be protected against backflow in accordance with requirements of this section and the *International Illinois Plumbing Code*.

(36) Section 903.3.5.1.1 is amended as follows:

**Section 903.3.5.1.1 Limited area sprinkler systems.** Limited area sprinkler systems serving fewer than 20 sprinklers on any single ~~connection system~~ are permitted to be connected to the domestic service where a wet automatic standpipe is not available. Limited area sprinkler systems connected to domestic water supplies shall comply with each of the following requirements:

1. Valves shall not be installed between the domestic water riser control valve and the sprinklers.  
**Exception:** An *approved* indicating control valve supervised in the open position in accordance with Section 903.4.
2. The domestic service shall be capable of supplying the simultaneous domestic demand and the sprinkler demand required to be hydraulically calculated by NFPA 13, NFPA 13R or NFPA 13D.
3. The maximum number of sprinklers on multiple limited area sprinklers systems within a building may not exceed 40.

(37) Section 903.3.7 is amended as follows:

**903.3.7 Fire department connections:** The location of fire department connections shall be *approved by the fire code official*.

**Exception:** Multiple limited area sprinkler systems contained within a building supplied from domestic water system with not more than a total of 20 sprinklers per system and a maximum of 40 sprinkler heads total are not required to have a fire department connection.

(38) Section 903.3.8 is added as follows:

**903.3.8 Control valves:** All fire suppression systems installed in accordance with 903.3.1.1 and 903.3.1.2, shall have an exterior Indicator

Valve (PIV or WPIV) provided in a location approved by the Fire Code Official.

**Exception:** Control valves located not more than twenty-five feet horizontal and ten feet vertical travel distance from an exterior access door. Such outside access doors shall be clearly marked on the outside with one inch or larger letters stating: "Main sprinkler valve access" or other markings as approved by the Fire Official.

(39) 903.4.2 is amended as follows:

**903.4.2 Alarms:** *Approved* audible and visible devices shall be connected to every *automatic sprinkler system*.

The remainder of this section is unchanged.

(40) Section 905.3.1 is amended as follows:

**905.3.1 Building height.** Class III I standpipe systems shall be installed throughout buildings where the floor level of the highest story is located more than ~~30~~ 24 feet (~~9144~~ 7315 mm) above the lowest level of fire department vehicle access, or where the floor level of the lowest story is located more than ~~30~~ 24 feet (~~9144~~ 7315 mm) below the highest level of fire department vehicle access.

(41) Section 906.1 is amended as follows:

**906.1 Where required.** Portable fire extinguishers shall be installed in the following locations.

1. In all Group A, B, E, F, H, I, M, R-1, R-2, R-4 and S occupancies.  
**Exception:**(Delete and replace with the following:) Existing R-2 occupancies with less than 6 dwelling units.
- 2 - 6 Unchanged
7. As required by ASME A17.1 and A17.3 for elevator equipment rooms.

(42) Section 907.2 is amended as follows.

**907.2 Where required-new buildings and structures.** An *approved* fire alarm system installed in accordance with the provisions of this code and NFPA 72 shall be provided in new buildings and structures in accordance with Sections 907.2.1 through 907.2.23 and the Illinois Accessibility Code

(IAC). and provide occupant notification in accordance with Section 907.6, unless other requirements are provided by another section of this code.

Second paragraph unchanged.

(43) 907.2.1 is amended as follows:

**907.2.1 Group A.** A manual fire alarm system that activates the occupant notification system in accordance with Section 907.6 shall be installed in Group A occupancies having an *occupant load* of 300 or more and when located two or more stories above or below the level of discharge. Portions of Group E occupancies occupied for assembly purposes shall be provided with a fire alarm system as required for the Group E occupancy.

**Exception:** is deleted.

(44) Section 907.2.6 is amended as follows:

**907.2.6 Group I.** A manual fire alarm system that activates the occupant notification system shall be installed in Group I occupancies. An automatic smoke detection system that activates the occupant notification system shall be provided in accordance with Sections 907.2.6.1 through 907.2.6.3.3.

**Exceptions:**

1. Manual fire alarm boxes in resident or patient sleeping areas of Group 1-1 and 1-2 occupancies shall not be required at *exits* if located at all nurses' control stations or other constantly attended staff locations, provided such stations are visible and continuously accessible and that travel distances required in Section 907.5.2 are not exceeded.
2. Occupant notification systems are not required to be activated where private mode signaling installed in accordance with NFPA 72 is *approved* by the *fire code official*.
3. Group I-4 occupancies with not more than 16 occupants excluding staff shall not require manual fire alarm or automatic fire detection systems.

(45) 907.2.11.2 is amended as follows:

**907.2.11.2 Groups R-2, R-3, R-4, and I-I and I-4.** Single or multiple-station smoke alarms shall be installed and maintained in Groups R-2, R-3, R-4, ~~and I-I~~ and I-4 regardless of *occupant load* at all of the following locations:

The remainder of this section remains unchanged.

(46) Section 907.2.11.3 is amended as follows:

**907.2.11.3 Interconnection.** Where more than one smoke alarm is required to be installed within an individual *dwelling unit* or *sleeping unit* in Group R-1, R-2, R-3 or R-4, within an individual guestroom or suite in Group R-1, or within Group I-4 occupancies the smoke alarms shall be interconnected in such a manner that the activation of one alarm will activate all of the alarms in the individual unit or occupancy. The alarm shall be clearly audible in all bedrooms or spaces in Group I-4 occupancies over background noise levels with all intervening doors dosed.

**Exceptions:**

1. Smoke alarms that are permitted to be solely battery operated in accordance with section 907.2.10.2 are not required to be interconnected.
2. Smoke alarms in existing Group R areas are not required to be interconnected where alterations and repairs regulated by Section 907.2.10.1.4 do not result in the removal of interior wall or ceiling finishes exposing the structure between alarm(s).
3. Interconnection may be by the use of radio-frequency (RF) where installation of wire is not practical.

(47) Section 907.2.11.4 is amended as follows:

**907.2.11.4 Power source.** In new construction, required smoke alarms shall receive their primary power from the building wiring where such wiring is served from a commercial source and shall be equipped with a battery backup. Smoke Alarms shall emit a signal when the batteries are low. Wiring shall be permanent and without a disconnecting switch other than as required for over current protection.

**Exceptions:**

1. Smoke alarms are not required to be equipped with a battery backup in Group where they are connected to an emergency electrical system.
2. Smoke alarms are permitted to be solely battery operated in Group R existing buildings, buildings not served from a commercial power source and in existing Group R areas where alterations and repairs regulated by Section 907.2.10.1.4 do not result in the removal of interior wall or ceiling finishes exposing the structure between alarm(s) and a building wiring power source.

(48) 907.2.13 is amended as follows:

**907.2.13 High-rise buildings.** Buildings with a floor used for human occupancy located more than ~~75 65~~ feet (~~22 860~~ 19 812 mm) above the lowest level of fire department vehicle access shall be provided with an automatic smoke detection system in accordance with Section 907.2.13.1, a fire department communication system in accordance with Section 907.2.13.2 and an emergency voice/alarm communication system in accordance with Section 907.6.2.2.

**Exceptions:** 1-6 remain unchanged.

(49) Section 910.2.1 is hereby deleted.

(50) Section 910.2.2 is hereby deleted.

(51) Section 912.5 is amended as follows:

**912.5 Backflow protection.** The potable water supply to automatic sprinkler and standpipe systems shall be protected against backflow as required by the ~~International~~ Illinois State Plumbing Code.

(52) Section 915.0 is added as follows:

**SECTION 915  
CARBON MONOXIDE ALARMS**

**Section 915.0 Carbon Monoxide Alarms.** For the purposes of this Section, at a minimum, carbon monoxide alarms shall be installed throughout every dwelling as required in accordance with State

of Illinois Carbon Monoxide Alarm Detector Act, 430 ILCS 135/135-1/2, and in accordance with the following:

1. Within 15 feet of every room used for sleeping purposes. The carbon monoxide alarm can be combined with smoke detecting devices provided that the combined unit complies with the respective provisions of the administrative code, reference standards, and departmental rules relating to both smoke detecting devices and carbon monoxide alarms and provided that the combined unit emits an alarm in a manner that clearly differentiates the hazard.
2. Every structure that contains more than one dwelling unit shall contain at least one approved carbon monoxide alarm in operating condition within 15 feet of every room used for sleeping purposes.
3. The carbon monoxide alarms required under this Act may be either battery powered, plug-in with battery back-up, or wired into the structure's AC power line with secondary battery back-up.
4. For new construction, carbon monoxide detectors shall receive their power from the primary building source

(53) Section 1003.4 is amended as follows:

**1003.4 Floor surface.** Walking surfaces of the means of egress shall have a slip-resistant surface and be securely attached. Minimum coefficients of friction for any walking surfaces shall be .06 on surfaces with slopes 1:20 or less and 0.8 on surfaces with slopes greater than 1:20.

(54) Section 1009.4.2 is amended as follows:

**1009.4.2 Riser height and tread depth.** *Stair* riser heights shall be 7 inches (178 mm) maximum and 4 inches (102 mm) minimum. The riser height shall be measured vertically between the leading edges of adjacent treads. Rectangular tread depths shall be 11 inches (279 mm) minimum measured horizontally between the vertical planes of the foremost projection of adjacent treads and at a right angle to the tread's leading edge. *Winder* treads shall have a minimum tread depth of 11 inches (279 mm) measured between the vertical planes of the foremost projection of adjacent treads at the intersections with the walkline and a minimum tread depth of 10 inches (254 mm) within the

clear width of the *stair*. Treads and risers shall be so proportioned that the sum of two risers plus one tread, exclusive of nosing, is not less than 24 inches nor more than 26 inches.

**Exceptions:**

1-4 Remain unchanged.

5. ~~In Group R-3 occupancies; w~~ Within dwelling units in Group R-2 occupancies; and in Group U occupancies that are accessory to a ~~Group R-3 occupancy or accessory to~~ individual dwelling units in Group R-2 occupancies; the maximum riser height shall be 7-3/4 inches (197 mm); the minimum tread depth shall be 10 inches (254 mm); the minimum winder tread depth at the walkline shall be 10 inches (254 mm); and the minimum winder tread depth shall be 6 inches (152 mm). A nosing not less than 3/4 inch (19.1 mm) but not more than 3/4 inches (32 mm) shall be provided on stairways with solid risers where the tread depth is less than 11 inches (279 mm).

6-7 Remains unchanged.

(55) Section 1009.4.5 exceptions are amended as follows:

**1009.4.5 Profile.**

**Exceptions:**

1. Solid risers are not required for *stairways* that are not required to ~~comply with Section 1007.3~~ be accessible by IAC, provided that the opening between treads does not permit the passage of a sphere with a diameter of 4 inches (102 mm).

Exceptions 2-4 remain unchanged.

(56) Section 109.6.2 is amended as follows:

**109.6.2. Outdoor conditions.** Outdoor *stairways* and outdoor approaches to *stairways* shall be designed so that water will not accumulate on walking surfaces. Openings in treads, platforms, and landings are permitted for outdoor stairways not exceeding two stories in height, provided openings do not exceed one-half inch in the primary direction of travel.

(57) Section 1009.12 exceptions are amended as follows:

**1009.12 Handrails.**

Exceptions 1-3 remain unchanged.

Exception #4 is deleted and replaced as follows:

4. Handrails are not required for two or less risers.

Exception #5 is hereby deleted.

(58) Section 1010.2 is amended as follows:

**1010.2 Slope.** *Ramps* used as part of a *means of egress* shall have a running slope not steeper than one unit vertical in 12 units horizontal (8-percent slope.) The slope of other ramps shall not be steeper than ~~one unit vertical in eight units horizontal (12.5 percent slope)~~ permitted by the *Illinois Accessibility Code*.

(59) Section 1012.3 is deleted and replaced as follows:

**1012.3 Handrail graspability.** All handrails shall be in accordance with *Illinois Accessibility Code Section 400.310q2*.

(60) Section 1012.6 is amended as follows:

**1012.6 Handrail extensions.** *Handrails* shall return to a wall *guard* or the walking surface or shall be continuous to the handrail of an adjacent *stair flight* or ramp run, Where *handrails* are not continuous *between flights*, the *handrails* shall extend horizontally at least 12 inches (305 mm) beyond the top riser and continue to slope for the depth of one tread plus 12 inches (305 mm) horizontally beyond the bottom riser. At *ramps* where *handrails* are not continuous between runs, the *handrails* shall extend horizontally above the landing 12 inches (305 mm) minimum beyond the top and 12 inches (305 mm) plus 12 inches (305 mm) horizontally at the bottom of *ramp* runs. The extensions of *handrails* shall be in the same direction of the *stair flights* at *stairways* and the *ramp* runs at *ramps*.

**Exceptions:**

1. *Handrails* within a dwelling unit that is not required to be *accessible* by the IAC need extend only from the top riser to the bottom riser.

Exceptions 2-3 remain unchanged.

(61) Section 1010.2 is amended as follows:

**1010.2 Slope.** *Ramps* used as part of a *means of egress* shall have a running slope not steeper than one unit vertical in 12 units horizontal (8-percent slope.) The slope of other *ramps* shall not be steeper than ~~one unit vertical in eight units horizontal (12.5 percent slope)~~ permitted by the *Illinois Accessibility Code*.

(62) Section 1013.2 is amended by adding exception #5 as follows:

### 1013.2 Height

#### Exceptions:

1. In other than occupancies in Use Group E, guards shall not be less than 36 inches (914 mm) in height above the leading edge of the tread along stairs which are not more than 20 feet (6096 mm) in height or which reverse direction at an intermediate landing with 12 inches (305 mm) or less measured horizontally between successive flights. Guard height may remain at 36 inches (914 mm) for the length of handrail extensions required by Section 1012.6.

(63) Section 1015.1 is amended by adding exception #2 as follows:

**1015.1 Exits or exit access doorways from spaces.** Two *exits* or *exit access doorways* from any space shall be provided where one of the following conditions exists:

**Exception:** Group 1-2 occupancies shall comply with Section 1014.2.2 through 1014.2.7.

1. The *occupant load* of the space exceeds one of the values in Table 1015.1.

**Exception:** In Group R-2 and R-3 occupancies, one *means of egress* is permitted within and from individual dwelling units with a maximum *occupant load* of 20 where the dwelling unit is equipped throughout with an *automatic sprinkler system* in accordance with Section 903.3.1.1 or 903.3.1.2.

2. The *common path of egress travel* exceeds one of the limitations of Section 1014.3.
3. Where required by Section 1015.3, 1015.4, 1015.5, 1015.6 or 1015.6.1.

4. Travel distances for use group B may be increased to 100 feet if entire building has an automatic sprinkler system in accordance with Section 903.3.1.1 and all spaces served by the means of egress have automatic smoke detection in accordance with NFPA 72 for full space detection.

Where a building contains mixed occupancies, each individual occupancy shall comply with the applicable requirements for that occupancy. Where applicable, cumulative *occupant loads* from adjacent occupancies shall be considered in accordance with Section 1004.1.

(64) Section 1015.2.1 is amended as follows:

#### 1015.2.1 Two exits or exit access doorways.

Where two *exits* or *exit access doorways* are required from any portion of the *exit access*, the *exit doors* or *exit access doorways* shall be placed a distance apart equal to not less than one-half of the length of the maximum overall diagonal dimension of the building or area to be served measured in a straight line between *exit doors* or *exit access doorways*. Interlocking or *scissor stairs* shall be counted as one *exit stairway*. Where more than one exit or exit discharge doors are required, the distance measured along an exterior wall shall not be less than 20 feet.

#### Exceptions:

1. Is hereby deleted.
2. Where a building is equipped throughout with an *automatic sprinkler system* in accordance with Section 903.3.1.1 or 903.3.1.2, the separation distance of the *exit doors* or *exit access doorways* shall not be less than one-third of the length of the maximum overall diagonal dimension of the area served.

(65) Section 1016.1 is amended by adding exception #5 as follows:

#### 1016.1 Construction.

#### Exceptions:

5. In Use Group B serving greater than 30 occupants but fewer than 75 occupants, the fire-resistant rating of a corridor shall not be required if an automatic fire

detection system or single or multiple station smoke alarms in accordance with NFPA 72 provide full space detection for all spaces served by the corridor.

(66) Section 1022.8 is amended as follows:

**1022.8 Floor identification signs.** A sign shall be provided at each floor landing in *exit enclosures* connecting more than three stories designating the floor level, the terminus of the top and bottom of the *exit enclosure* and the identification of the *stair* or *ramp*. The signage shall also state the *story* of, and the direction to, the *exit discharge* and the availability of roof access from the enclosure for the fire department. The sign shall be located 5 feet (1524 mm) above the floor landing in a position that is readily visible when the doors are in the open and closed positions. Floor level identification signs in tactile characters complying with ICC A117.1 the Illinois Accessibility Code shall be located at each floor level landing adjacent to the door leading from the enclosure into the corridor to identify the floor level.

(67) Section 1022.9 is amended as follows:

**1022.9 Smokeproof enclosures and pressurized stairways.** In buildings required to comply with Section 403 or 405, each of the *exit enclosures* serving a *story* with a floor surface located more than ~~75~~ 65 feet (~~22 860~~ 19 812 mm) above the lowest level of fire department vehicle access or more than 30 feet (9144 mm) below the finished floor of a *level of exit discharge* serving such stories shall be a *smokeproof enclosure* or pressurized *stairway* in accordance with Section 909.20.

(68) Section 1024.1 is amended as follows:

**1024.1 General.** *Approved* luminous egress path markings delineating the exit path shall be provided in buildings of Groups A, B, E, I, M and R-I having occupied floors located more than ~~75~~ 65 feet (~~22 860~~ 19 812 mm) above the lowest level of fire department vehicle access in accordance with Sections 1024.1 through 1024.5.

**Exceptions:** Remain Unchanged

(69) Section 1026.2 is amended as follows:

**1026.2 Use in a means of egress.** *Exterior exit stairways* shall not be used as an element of a

required *means of egress* for Group 1-2 occupancies. For occupancies in other than Group I-2, *exterior exit ramps* and *stairways* shall be permitted as an element of a required *means of egress* for buildings not exceeding ~~six~~ three stories above grade plane or having occupied floors more than 75 feet (22 860 mm) above or three stories above the lowest level of fire department vehicle access.

(70) Section 1028.10.2 is amended as follows:

**1028.10.2 Single access.** For rows of seating served by an *aisle* or doorway at only one end of the row, the minimum clear width of 12 inches (305 mm) between rows shall be increased by 0.6 inch (15.2 mm) for every additional seat beyond seven seats, but the minimum clear width is not required to exceed 22 inches (559 mm).

**Exceptions:**

1. For *smoke-protected assembly seating*, the row length limits for a 12-inch-wide (305 mm) *aisle access way*, beyond which the *aisle access way* minimum clear width shall be increased, are in Table 1028.10.1.
2. For areas serving not more than 50 occupants, the common path of travel shall not exceed 75 feet (22 860 mm).
3. For smoke-protected assembly seating, the common path of travel shall not exceed 50 feet (15,240 mm).
4. For smoke-protected assembly seating there shall not be more than 40 seats between the two aisles and the minimum clear width shall be 12 inches (305 mm) plus 0.3 (7.6 mm) for each additional seat.

(71) Section 2204.3.5 is amended as follows:

**2204.3.5 Emergency procedures.** An approved emergency procedures sign, in addition to the signs required by Section 2205.6, shall be posted in a conspicuous location and shall read:

<p>IN CASE OF FIRE, SPILL OR RELEASE</p> <p>1. USE EMERGENCY PUMP SHUTOFF</p> <p>2. REPORT THE ACCIDENT!</p> <p style="text-align: center;"><del>FIRE DEPARTMENT</del></p> <p>EMERGENCY TELEPHONE NO. _____ 911</p> <hr/> <p>FACILITY ADDRESS</p> <hr/> <p>STATION OWNER TELEPHONE NO.</p> <hr/> <p>STATION OWNER ADDRESS</p>
-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

(72) Section 2204.3.8 is added as follows:

**2204.3.8 Facility design and construction.**

Unattended self-service stations shall be designed and constructed to include the following:

1. A dry chemical suppression system (DCFSS) with heat detection sensors located above each fuel dispensing device that activate the DCFSS. The DCFSS shall cause chemical dispersion through ground sweep nozzles located on each side of all dispenser islands and a nozzle above each fuel dispensing device. Activation of the DCFSS shall automatically disconnect electric power to all fuel dispensing pumps and dispensers.
2. Video surveillance cameras to record views of all fuel dispensing devices, the emergency disconnect switch required by Section 2203.2 and the control building. A recording device capable of storing a minimum of the immediately previous 24 hours in time labeled data on a continuous basis. Facility lighting adequate for this purpose but not to exceed that required by the City of Rockford Zoning Ordinance.
3. Overfill protection with both an audible alarm and an in tank limiting device.
4. An automatic tank monitoring system to monitor electronic line leak detectors,

sump sensors, tank test and product deliveries. System shall be equipped with an automatic notification to the station owner and shall notify the owner of any tank system problem.

5. A alarm system monitoring the control building, dispensers and DCFSS that is monitored by a third party off-premise monitoring firm that maintains continuous operation (24 hours a day, 7 days a week). The third party monitoring firm shall immediately forward any emergency to the appropriate agencies.
6. A trench drainage system at a minimum slope of 1 ½% from fuel dispensing islands to provide collection point at the downhill side. System shall be connected to the sanitary sewer via a site specific engineered oil-water separator. Size of the separator shall be determined by industry accepted standards. A valid permit for the drainage system and separator shall be obtained and maintained from the Rock River Water Reclamation District. The station shall have a comprehensive spill prevention plan to control and recover spilled product.
7. Requirements established in applicable sections of Title 41 of the Illinois Administrative Code, Chapter 1, Part 170, Storage, Transportation, Sale and use of Petroleum and other Regulated Substances where more restrictive than this code.

(73) Section 2204.4.4 is added as follows:

**2204.4.4 Maximum size.** No portable container larger than six gallons shall be filled with gasoline, except as dispensed directly into the fuel tanks attached to a motor vehicle. All portable containers shall comply with 430 ILCS 20/1 and the Illinois Administrative Code.

(74) Section 2204.5 is added as follows:

**2204.5 Permit.** Attended and unattended self service stations shall, in accordance with provisions of Section 105, require an initial construction and annual operation permit.

(75) Section 2204.5.1 is added as follows:

**2204.5.1 Application.** Written application on a form provided by the city shall be made to the Revenue Division of the Finance Department. All information requested on form shall be provided and accompanied by permit fee established in Section 6-15 of the City of Rockford Code of Ordinances. Permits expire on December 31 of each year. Operation permits shall be obtained on or before January 1 of each year.

(76) Section 2204.5.2 is added as follows:

**2204.5.2 Approval.** Upon receipt of application, the Revenue Division of the Finance Department shall forward said application to the Fire Prevention Division of the Fire department for review and approval or denial. If denied, reasons for such denial shall be listed in writing.

(77) Section 2204.5.3 is added as follows:

**2204.5.3 Violations, suspension or revocation.** The Fire Chief or his designee may, for violation of any local, state or federal law, code or regulation, suspend or revoke a self-service station permit. The Fire Chief shall have notice of violation served on the permit holder listing the violation(s), setting a hearing date, and advising the permit holder of his opportunity to appear and be heard at such hearing. Said notice shall be served in person or by certified and regular first class U.S. mail to the permit holder at least five (5) days prior to the hearing. Upon conducting a hearing, the code official shall issue a written decision to be served upon the permit holder by first class U.S. mail prior to any suspension or revocation taking affect. The Fire Chief's decision shall be final.

(78) Section 2204.6 is added as follows:

**2204.6 Location of self-service dispensing devices.** Pumps and dispensing devises shall be not less than ten (10) feet prom a lot line and not less than five (5) feet from any building wall opening.

(79) Section 2403.2 deleted and replaced with the following:

**2403.2 Temporary membrane structures, canopies and tents.** A permit is required to construct an air-supported temporary membrane structure and tent having an aggregate area in

excess of 120 square feet (11.15 m<sup>2</sup>). A permit is required to construct a canopy having an aggregate area in excess of 400 square feet (37 m<sup>2</sup>).

**Exceptions:**

1. One day use in conjunction with residential uses unless the tent, canopy requires electrical permit and inspections due to use of electric equipment.
2. Tents used exclusively for private recreational purposes.
3. Tents or canopies used in conjunction with funeral services.
4. Tents open on all sides which comply with all of the following:
  - a. Individual tents shall have a maximum size of 400 square feet (65 m<sup>2</sup>).
  - b. The aggregate area of multiple tents placed side by side without a fire break clearance of not less than 12 feet (3658 mm) shall not exceed 700 square feet (65 m<sup>2</sup>) total.
  - c. Tents, canopies or membrane structures shall not be located within 20 feet (6096mm) of lot lines, buildings or other tents or membrane structures, parked vehicles or combustion engine unless approved by the fire code official.

(80) Section 2404.15.5 is hereby deleted.

(81) 2703.5.2 is added as follows:

**2703.5.2 Materials Not Listed In Standards.** Where specific hazard postings are not within the standards listed in Chapter 44 of this code, the fire official shall specify a method.

(82) Section 2703.6 is amended as follows:

**2703.6. Signs.** Signs and markings required by Sections 2703.5, 2703.5.1 and 2703.5.2 shall not be obscured or removed, shall be in English as a primary language or in symbols allowed by this code, shall be durable, and the size, color and lettering shall be approved. It shall be the duty of the owner, lessee, or person in control of premises to procure and post hazard identifications signs as specified in this section.

(83) Section 3401.1 is amended as follows:

**3401.1 Scope and application.** Prevention control and mitigation of dangerous conditions related to storage, use, dispensing, mixing and handling of flammable and *combustible liquids* shall be in accordance with all regulations set forth by the State of Illinois, Chapter 27 and this chapter. In the event of a conflict, the State of Illinois requirements shall take precedence.

(84) Section 3401.4.1 is added as follows:

**3401.4.1 Permits.** A permit shall be required to remove, abandon, place temporarily out of service or otherwise dispose of any flammable or combustible liquid storage tank and piping. Failure to meet the requirements of this section gives the City of Rockford the authority to have all tanks removed and a lien placed against the property owner to recover the cost.

(85) Table 4603.1 is removed and replaced as follows:

(See Page 19 of Amendments for new Table 4603.1)

(86) Section 4603.4 is amended as follows, by adding Section 4603.4.3 and subsections 4603.4.3.1 and 4603.4.3.2, and 4603.4.4:

**4603.4 Sprinkler systems.** An automatic sprinkler system shall be provided in existing buildings in accordance with Sections 4603.4.1 and 4603.4.2, 4603.4.3, and 4603.4.4.

**4603.4.3 High-rise buildings.** All existing high-rise occupancy buildings shall be provided with a reasonable degree of safety from fire. Such degree of safety shall be accomplished by the installation of a complete, approved, supervised automatic sprinkler system in accordance with Section 914.3 or an engineered life safety system.

An engineered life safety system shall be developed by a registered professional engineer who is experienced in fire and life safety systems design. The system shall be approved by the authority having jurisdiction and might include any or all of the following systems:

1. Partial automatic sprinkler protection
2. Smoke detection alarms
3. Smoke control

4. Compartmentation

5. Other approved systems

**4603.4.3.1 Compliance.** A limited but reasonable time shall be permitted for compliance with Section 4603.4.3, commensurate with the magnitude of expenditure and the disruption of services.

**4603.4.3.2 Other Requirements.** In addition to the requirements of 4603.4.3, all buildings, regardless of height, shall comply with all other applicable provisions of this chapter.

**4603.4.4 Assembly occupancies below level of exit discharge.** Any assembly occupancy regardless of classification below the level of exit discharge shall be protected throughout by an approved automatic sprinkler system in accordance with the following:

1. The level of the assembly occupancy.
2. Any level intervening between the level of the assembly occupancy and the level of exit discharge.
3. The level of exit discharge if there are openings between the level of exit discharge and the exits serving the assembly occupancies.

(87) Section 4603.6 is amended as follows, by adding Section 4603.6.8 and 4603.6.9 and subsection 4603.6.9.1.

**4603.6 Fire alarm systems.** An approved fire alarm system shall be installed in existing buildings and structures in accordance with Sections 4603.6.1 through ~~4603.6.7~~ 4603.6.9 and provide occupant notification in accordance with Section 907.6 unless other requirements are provided by other sections of this code.

**4603.6.8 Group A.** A manual fire alarm system shall be provided in accordance with Section 907.2.1.

**4603.6.9 High rise structures.** All existing high-rises shall be protected with an automatic fire alarm system and an automatic smoke detection system in accordance with Section 907.2.13.

**4603.6.9.1 Compliance.** A limited but reasonable time shall be permitted for compliance with any Section 4603.9.1, commensurate with the magnitude of expenditure and the disruption of services.

(88) Section 4604.9.1 is added as follows:

**4604.9.1 Assembly Occupancies.** In an assembly occupancy, any door in a required means of egress from an area having an occupant load of 100 or more persons shall be permitted to be provided with a latch or, provided the door is equipped with panic hardware.

(89) Appendix A is hereby deleted.

(90) Appendix D, Section D103.1 is amended as follows:

**D103.1 Access road width with a hydrant.** Where a fire hydrant is located on a fire apparatus access road, the minimum road width shall be 26 feet (7925 mm) for a distance of 20 feet (6096 mm) in each direction from the hydrant along the length of the access road. ~~See Figure D103.1.~~

Delete Figure D103.1.

(91) Section D103.4 is amended as follows:

**D103.4 Dead ends.** Dead-end fire apparatus access roads in excess of 150 feet (45 720 mm) shall be provided with ~~width and turnaround provisions in accordance with Table D104.4~~ a turnaround or outlet at the closed end of at least ninety feet (27 432 mm) in diameter.

Delete Table D103.4.

(92) Section D103.6 is amended as follows:

Table 4603.1

**D103.6 Signs.** ~~Where required by the code official, fire apparatus access roads are required by Section 503 or Appendix D, they shall be marked with permanent NO PARKING-FIRE LANE signs complying with Figure D103.6 City of Rockford specifications. Signs shall have a minimum dimension of 12 inches (305 mm) wide by 18 inches (457 mm) high and have red letters on a white reflective background.~~ Signs shall be posted on one or both sides of the fire apparatus road as required by Section D103.6.1 or D103.6.2. Spacing of signs shall be at a maximum of 75 feet (22 860 mm) or at the discretion of the code official. New signs and existing signs that are unserviceable due to damage or weathering shall be installed or replaced at the expense of the property owner.

TABLE 4603.1 OCCUPANCY AND USE REQUIREMENTS
