### *7<sup>th</sup> Street Lighting Project (Phase II)*

Beginning Tuesday, May 31<sup>st</sup>, 2016, construction activities will begin on the second phase of the 7<sup>th</sup> Street Lighting project. This phase of the project consists of street lighting improvements, traffic signal upgrades, areas of sidewalk replacement and streetscape elements to the 7<sup>th</sup> Street corridor from 2<sup>nd</sup> Avenue to Charles Street. These improvements will be consistent with the first phase improvements. Construction of this phase is anticipated to be completed by August 26, 2016.

Traffic will remain open to traffic along 7<sup>th</sup> Street throughout the length of construction. Temporary street lights will be installed while the old street lights are being removed and new street lights are being installed.

Questions regarding these improvements should be directed to Jeremy Carter, City Traffic Engineer, at the Public Works Department.
