North Main & Auburn Street Roundabout Project

It is anticipated that on September 16th at 7:00 am the intersection of N. Main Street and Auburn Street will be completely closed to traffic until 7:00 am on September 25th. The limits of the closure on Auburn Street will be from Latham Pl to Sheridan St., and on N. Main Street will be from Boilvin Ave/Reynolds St. to Yonge Street. Traffic will not be able to enter this area during the closure. A detour will be posted (see attached).

During the closure, work will occur during the night time and early morning hours. Construction activities during the closure will include pavement removal, paving, curb and gutter installation, utility adjustments, and so forth. These activities are being completed under the full closure due to their proximity to the current traffic lanes as well as staging limits.

Vernon Street and Yonge Street at the North Main intersections are currently closed. Please note that King Street at the North Main Street intersection is also closed and Myott Avenue at the North Main Street intersection is open (right-in and right-out only). No access from or to North Main is permitted from Vernon Street, Yonge Street, and King Street.

Drivers are reminded that no turns are allowed at the North Main and Auburn Street intersection.

Businesses are open during construction and the public parking lots are accessible. The public parking lots are located off of Toner Avenue and Latham Pl. Drivers are encouraged to utilize Sheridan St. and Boilvin Ave to access the public parking lot at the southeast corner of the N. Main Street and Auburn Street intersection, and

Reynolds Street and Church Street for the parking lot at the southwest corner of the N. Main Street and Auburn Street intersection.

Drivers are encouraged to consider alternate routes during the project construction. Drivers are also reminded to obey work zone speed limits and to stay alert for workers when driving through the construction zone.

The City of Rockford appreciates your patience and cooperation during this project.

Questions regarding this project should be directed to Jamie Rott in the Public Works Department at (815) 967-6742. Thank you for your consideration.
