West State Street Sidewalk Repairs (Wyman Street to Rock River)

Construction activities began today on the West State Street Sidewalk Repairs project. This project consists of street lighting improvements, traffic signal upgrades, sidewalk reconstruction and streetscape elements to the south side of West State Street from Wyman Street to the Rock River. These improvements will be consistent with the streetscape improvements to West State Street west of Wyman Street. Construction of this project is anticipated to be completed by the end of August, 2016.

Vehicular traffic will remain open to traffic along West State Street throughout the length of construction, however the sidewalk along the south side of West State Street will be closed to pedestrians.

Questions regarding these improvements should be directed to Timothy Hinkens, Assistant Traffic Engineer, at the Public Works Department.
