ELECTRIC BILL SURCHARGE

ROCKFORD – The City of Rockford today by representatives from First Energy Solutions, the City’s electric aggregation supplier, that they will be adding a one-time surcharge to the May, June or July bills for customers served by this agreement. The surcharge is a regulatory charge passed through by PJM Interconnection, the agency responsible for managing electric supply in the region. The charge was triggered by extreme weather in January, which increased demand and caused other supply issues.

The charge is allowed as a pass through charge in the terms and conditions of the agreement between Rockford customers and First Energy Solutions. They estimate that the charge for most residents will be approximately \$5. More information is available on First Energy Solution’s website here: <https://www.fes.com/content/fes/home/residential/rtoexpense.html>
