***US Business Rt. 20 FAP Rt. 303 (W. State St.) Sunset Avenue to Kent  
Creek Water and Sewer Main Reroute Project***

Lane closures will occur on West State Street in various locations until April 30<sup>th</sup>. During the lane closures, West State Street will be open to traffic.

Please use extreme caution when driving through the construction area.

US Business Rt. 20 FAP Rt. 303 (W. State St.) Sunset Avenue to Kent Creek Water and Sewer Main Reroute Project consists of the abandonment of existing water mains, valves, vaults, services and associated appurtenances, construction of 8-inch, 16-inch and 24-inch diameter water main, valves, hydrants, services and associated appurtenances, lining of an existing 24-inch diameter water main with 14-inch and 18-inch HDPE pipe, abandonment of sewers, sewer manhole removals, manhole replacements, construction of 8-inch, 10-inch and 15-inch diameter sanitary sewer and associated services and appurtenances. This is necessary in order to remove potential conflicts with the Illinois Department of Transportation's West State Street roadway reconstruction plans. Water main and sanitary sewer installation is underway starting east of Avon Street and at the intersection of West State Street and Lakin Ter.

Thank you in advance for your cooperation and patience while the City of Rockford makes improvements to the West State Street Corridor.

Questions regarding this project should be directed to Jamie Rott in the Public Works Department at (815) 967-6742. Thank you for your consideration.
