#### **AUBURN STREET REHABILITATION REVISED SCHEDULE**

**Rockford** – All lanes of Auburn Street between Harlem Boulevard and Main Street have been closed since March 1, 2006 to allow for sanitary sewer improvements which were due to be completed on May 1, 2006. Due to inclement weather and additional unforeseen sanitary work, construction will continue until May 15, 2006, at which time one lane in each direction will open until September 1, 2006.

Sanitary sewer improvements require that Auburn Street be closed to all through traffic. A marked detour route is posted, with Whitman Street as the primary detour route. Auburn Street will remain open to local traffic only. All other traffic, including all truck traffic, shall follow the marked detour route.
