##### **Outage Issue**

ETSB EJ Dilonardo commented about the 911 outage experienced one week prior. Dilonardo said he had no knowledge of the outage and had received calls about it. Chair Gary Caruana also stated that he also was not aware of the outage. Dilonardo stated that ETSB members should know about these outages, so that they are aware when they get calls. John Girone informed the board that there are planned and unplanned outages and what was experienced last week was the second major unplanned outage. Girone asked board members if they would want to be notified of the planned outages as well. Caruana suggested that they only be informed of the unplanned outages. He suggested that maybe a text group be created to send out the notifications. John Girone advised that the board has to be careful of text messaging the members because it becomes a public meeting if two members reply back. Board member Shawn Connors clarified that five members determine an official meeting but a notification of an outage would not qualify as a meeting. 911 Director Elizabeth Russell stated that there is a notification process in place that could be used to get the message out to board members, there is no ability to reply. Board members provided their contact

information. Dilonardo advised that he didn't want to create more work, but it would be nice to get this information. Elizabeth Russell advised that the process is seamless.

#### **Budget Info**

Prior to adjournment, Mike McCammond asked if for future budget meetings, like the special meeting conducted in August, if members could receive the budget document with the agenda so that members would be able to review prior to the meeting.
